

CERTIFIED REPAIR & MAINTENANCE
YOU CAN TRUST

The Future of Automotive Repair Is Changing

L&M Automotive Is Ready

From routine maintenance to advanced diagnostics
L&M Automotive is equipped, trained, and certified
to service today's electric vehicles

**We are ready,
Are you?**

The future of automotive isn't just electric—it's
connected, software-driven, and technology-heavy.
L&M Automotive is preparing today so we can continue
serving our customers tomorrow.

What This Means for You

- Accurate diagnostics—not guesswork
- Up-to-date scan tools and programming capabilities
- Knowledge of modern electronics and vehicle communication systems
- ADAS awareness and calibration support
- Technicians who understand both traditional mechanical systems and emerging technology

Newer vehicles are now equipped with

- Advanced driver assistance systems (ADAS) like lane keep assist, adaptive cruise control, collision warning, and parking sensors
- Software-based diagnostics and vehicle programming
- Hybrid and electric vehicle systems
- Complex sensors, cameras, and calibration requirements
- Connected systems that monitor performance, safety, and maintenance needs

How L&M Automotive Is Prepared for the Future?

- Advanced diagnostic and scan-tool technology
- Digital vehicle inspections for greater transparency
- Hybrid and EV service capabilities
- Ongoing technician education and training
- Modern repair procedures for today's increasingly software-driven vehicles

THE BOTTOM LINE:

Many vehicle owners miss problems simply because symptoms haven't become obvious yet. Catching concerns early could save you hundreds; or even thousands, before your warranty period ends. Don't wait until coverage expires and repairs become your responsibility.

At L&M Automotive, our goal is simple:
**Help you avoid unnecessary breakdowns, extend the life of
your vehicle, and keep you driving happy for the long haul.**
